DESIGN BROCHURE

- Unique Products
- Unique Solutions
- Be Different

ABOUT

DAVID BROWN

MANAGING DIRECTOR

Established in 1988 by David Brown, this award-winning company has developed a reputation for creative lighting design solutions. Our specialisation covers both commercial and exclusive domestic private clients, providing a bespoke design and project management service that reflects the client requirements.

OUR APPROACH

Our approach is to look to be different and provide our clients with a unique solution that works for their personal space. Our approach is cover in the following:

- **1 to 1 service:** the client is dealing directly with the designer that is designing their personal space.
- **Unique solutions:** lighting techniques and applications that deliver an efficient and cost-effective solution.
- **Unique products:** we develop cost effective, high quality and completely unique lighting products. These are a key component to achieving an effective lighting design solution. For this, we have developed two brands:

LIGHTING DESIGN

Lighting is recognised as a fundamental requirement in any environment whether it is interior or exterior, commercial or domestic. Light is the medium that enables our environment to be fully appreciated. It is the quality of this light that distinguishes good design from bad. We specialise in providing lighting solutions that deliver exceptional results for our clients.

Developing a lighting scheme can be overwhelming and time-consuming. The building process is diverse and requires a great deal of attention to all the facets of construction. We simply take this strain away and lead you through the maze. From concept to completion.

SERVICES

01

Creative Computer Aided Design (CAD) presentation

02

Lighting control systems and integration with other technologies

03

Wiring schematic drawings, Load schedules and energy management

04

Product specification, procurement and cost management

Project Management: programming, site supervision and commissioning.

PROJECT - DEERVIEW

PROJECT INFORMATION

Client: Deereview

Type: Residential – Refurbishment

Services: Cad Design, Lighting Control Systems, Technical Documentation, Product Supplier, Project Management

The project was a total refurbishment of a large scale home in an exclusive residential area. It involved working with the client to develop a brief, right through to commissioning the lighting and control systems.

PROJECT - ABRDN

PROJECT INFORMATION

Client: Abrdn

Type: Residential – Office Development

Services: Bespoke Lighting Concept, Technical Documentation, Product Manufacturing, Site Assembly

The project involved creating a bespoke lighting design for the entrance hall to the new offices in Queen Street Edinburgh. Abrdn wanted an illuminated glass sculptural chandelier to enhance the lobby and the first visitor received when entering the building.

PROJECT - AUCHEDDENNAN

PROJECT INFORMATION

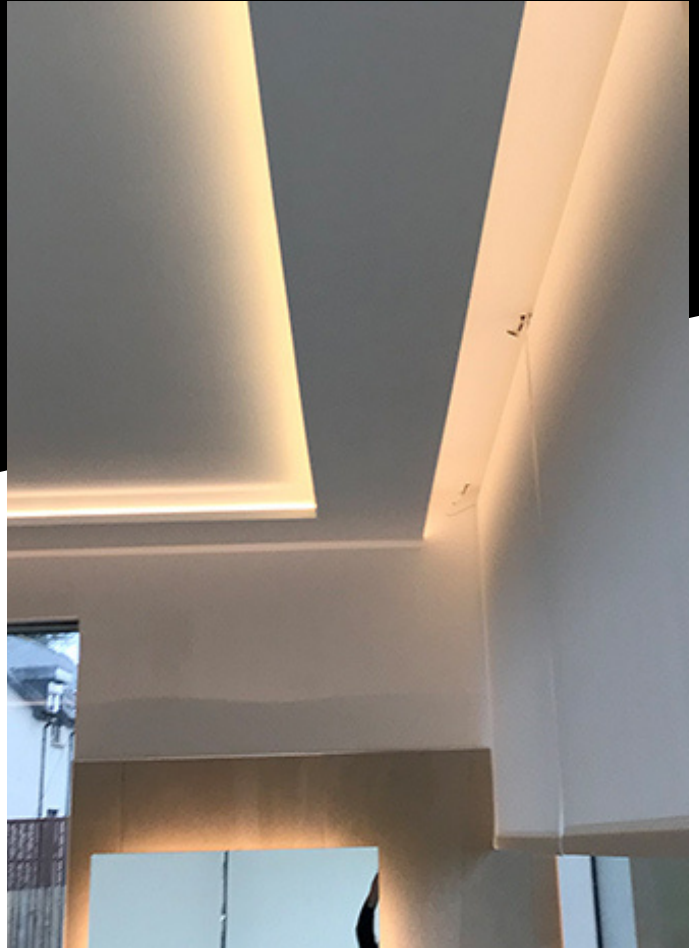

Client: Aucheddennan

Type: Commercial - Refurbishment

Services: Cad Design, Lighting Control Systems, Technical Documentation, Product Supplier, Project Management

The project was a total refurbishment of a castellated mansion in a scenic part of Scotland. We were invited to design a lighting strategy for the development of this listed historic building.

PROJECT - NETHERHALL

PROJECT INFORMATION

Client: Netherhall

Type: Residential – New Build

Services: Cad Design, Lighting Control Systems, Technical Documentation, Product Supplier, Project Management

The project was a large-scale residential new build in an exclusive new development. It involved working with the client to develop a brief, right through to commissioning lighting, window blinds and control systems.

PROJECT - INVERLEITH

PROJECT INFORMATION

Client: Murray Developments

Type: Residential – Refurbishment

Services: Cad Design, Lighting Control Systems, Technical Documentation, Product Supplier, Project Management

The project was a total refurbishment of a large-scale home in an exclusive residential area. It involved working with the client to develop a brief, right through to introducing some unique lighting solutions.
